Propelling Fiber Optics Communications Ahead

Innovative Fiber-to-the-X Solution Telescent SureConnect™

Protect Your
Fiber Optics

Telescent SureConnect™ unions protect delicate, polished fiber optic connectors in behind-the-wall (BTW) and permanent side interconnects and cross connects. The need for costly onsite repair of fiber optic connectors and the installation of quick termination connectors is eliminated when SureConnect™ protective union adapters are installed.

Standard union adapters offer no protection to prevent a contaminated or damaged fiber optic cable from transferring its damage to another fiber optic cable during repeated mating and demating. The resulting polished surface damage (PSD) typically leads to increased insertion loss and reduced return loss, both of which can seriously compromise the network's performance. The cost and time to repair damaged terminations is significant for fiber optic cabling installed within the users' facility. For instance, damage to connectorized, behind the wall (BTW) drop cables requires on-site repair by an experienced technician. In addition, limited access to damaged connectors within a populated, high-density fiber patch panel can make repairs difficult and time consuming.

FiberOpto Asia is the exclusive distributor for Telescent products

FiberOpto Asia

FiberOpto Asia Pte Ltd offers integrated solutions for FTTX (specialising in Fiber-to-the-Home) in Asia. We are a One-Stop Shop for Fiber Optics solutions. We co-operate with local and international consultancy partners to provide innovative solutions for FTTX. In addition, we also represent several international brands for their sales and distribution activities in Asia. We are also active in regional markets such as Malaysia, Indonesia, Thailand, Philippines, Brunei and Vietnam.

We offers services such as :

- Network Design & Consultancy
- Systems Integration & Engineering
- Project Management
- Product Engineering
- Network Installation
- Network Engineering & Maintenance
- Network Testing & Commissioning
- Fiber Optics Training
